

PRESS RELEASE

At Solar Solutions Torino, the Sun lights up Ideas, Expertise and New Business Opportunities

Turin, September 2025 – Solar energy is not only an endless source of technological innovation, but also a catalyst for relationships, knowledge and business opportunities. With this vision in mind, on October 1 and 2, 2025, Lingotto Fiere in Turin will host **Solar Solutions Torino**, with **The knowledge and trade summit in Northern Italy**, an event that blends exhibition and training, with a special focus on the photovoltaic and renewable energy markets in Northern Italy.

The Summit is divided into two main areas:

- **The conference area**, where experts, professionals, and speakers will share experiences, insights, and know-how through seminars and training sessions, eligible for continuing education credits.
- **The exhibitor area**, which will provide a tangible overview of the most innovative technologies and solutions in the sector.

This first Italian edition will showcase leading international companies that have already taken part in several Solar Solutions events across Europe, including:

- **Fox ESS**, a global leader in **smart inverters and storage solutions**. The company provides cutting-edge technology for the distribution, storage, and intelligent management of energy for residential, industrial, and commercial applications;
- **SL Rack**, a German company with over 25 years of experience in the solar industry, offering trend-setting complete **racking solutions** for roofs, facades, carports and ground mount applications. guided by values of **Safety, Love and Respect**;
- **PVcase**, a leading software company in **advanced solar design**, offering one end-to-end platform trusted by 1,800 clients in over 80 countries, powering the development of **more than 4 TW of projects** per year.

Alongside them, the excellence of Made in Italy will be represented by dynamic and fast growing companies, such as:

- **RCM Energy**, the latest evolution of RCM, a leading company in the field of **steel construction** for over 60 years. In the past year, the Cuneo-based company has realized and installed **over 300 MW of plants**;

- **Heiwit**, an innovative **startup** from Varese, founded with a clear vision to contribute to the decarbonization of the energy system by focusing on an alternative, safe, and economically viable technology: **sodium-ion batteries**;
- **Greenlife**, a company based in Reggio Emilia that recycles photovoltaic modules and other electronic equipment, **recovering over 95% of materials** in line with circular economy principles.

Solar Solutions Torino is not only a marketplace, but a hub where clean energy passion blends with professional connections and sharing of expertise.

The Summit is set for October 1 and 2, 2025, at Lingotto Fiere: two days to discover, exchange ideas, and build the future of solar energy in Italy, all together.

Visitor registration is now open: all professionals and industry operators can secure a free ticket using the invitation code provided by exhibitors and media partners, allowing access to the Summit and a front-row experience of innovation, training, and networking.

For those attending without an invitation, the ticket price is €75 + VAT.

A few exhibitor spots remain for companies that wish to join the event and become key players in the Summit.
